

If you imagined a Perfect World, what would it be like?

Join Paul Hutchins on a thought-provoking and awe-inspiring journey as he explores man's discovery of a Secret Doorway to a world BEYOND IMAGINATION. As you gaze at these amazing photos from space, consider his question: *If imagination is responsible for everything devised and created by man, then whose imagination is responsible for the incredible universe we have just begun to discover?*

In cinematic fashion and simple layman terms, Hutchins presents a real-life drama—one frame at a time—with each frame telling its own awesome story. But collectively, in detail never before revealed, these photos tell the Grandest Story ever told: the Creation of the Universe.

Although the author provides information about each of the incredulous photos contained herein, this is not intended to be an astronomy book. And, even though he calls attention to a curious and profound passage from the Bible—“*Look up into the Heavens. Who created all the stars?*”—it is not intended to be a book on religion. Hutchin's intent is to quench man's desire to find the answers to these questions:

Who created all the stars?

Where did we come from? How did we get here?

Are we alone? What is our purpose?

The Secret Doorway may change the way you believe.

“An inspiring and compelling story of man's and the universe's creation.”
